

A trusted e-signature experience.  
Transparent. Visible. Traceable.

The premier choice for digitizing financial signatures of Taiwan

## SelfieSign Video Signature

### SelfieSign Video Signature

SelfieSign's biggest advantage is our patented technology, SVS (Selfie Video Signature), an innovative solution, that offers the recording of the whole signing process as part of the signed document like no other electronic signature platform does.

The video recording of the signing process embedded in the SVS file is easy to use yet highly secured, lowers the uncertainty of electronic signature usage, serving the purpose of fully expressing the signer's willingness to sign, the signer's current situation of being mentally and physically aware of the signing process, and guaranteeing the document is signed by the person intended.
