

The premier choice for digitizing financial signatures of Taiwan

SelfieSign Video Signature

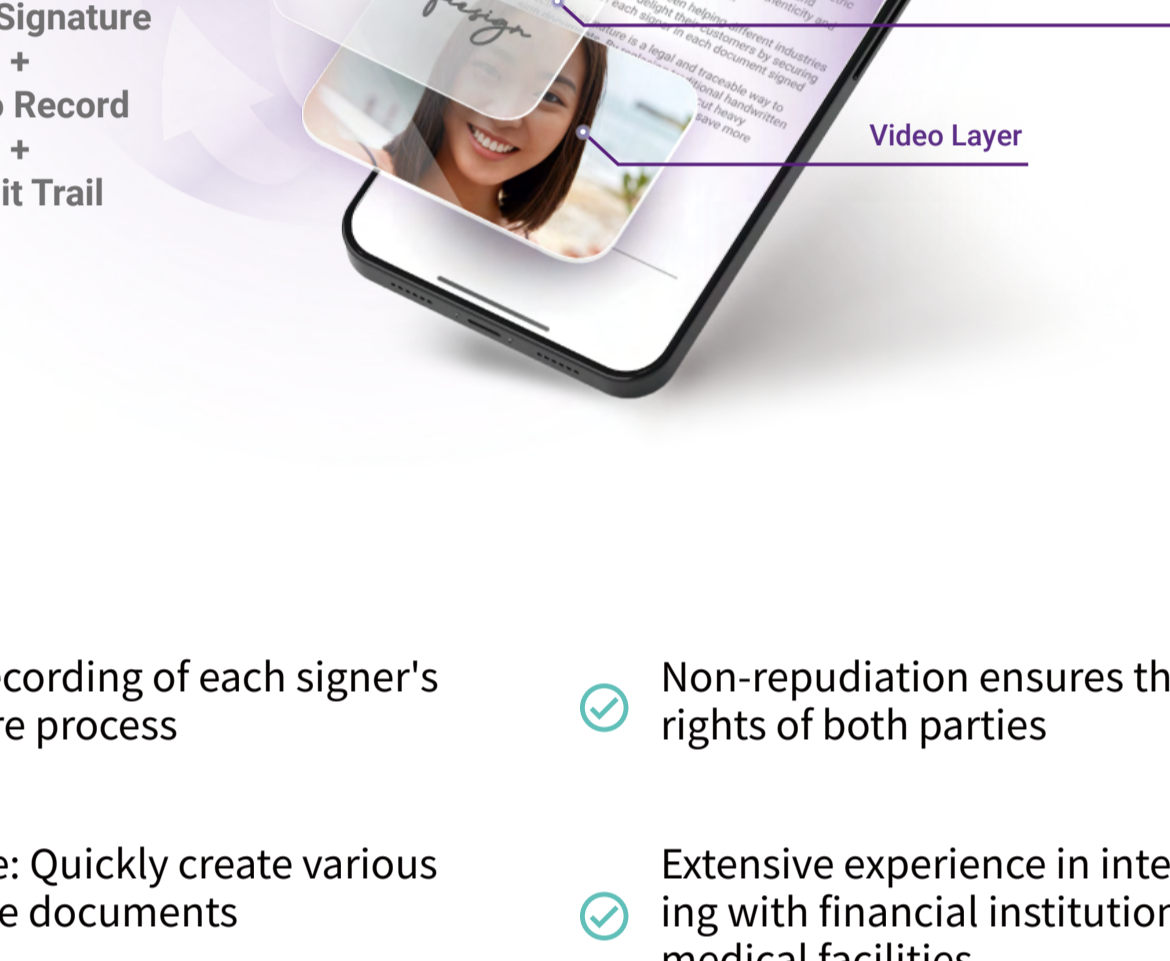

SelfieSign Video Signature

The Most Trustworthy Electronic Signature

SelfieSign combines video and audio recording with your signature to capture your unique biometrics. It adds timestamps, GPS location, Hashcode, and more to ensure document integrity and prevent tampering. This makes your signature legally binding and non-repudiable. SelfieSign is perfect for paperless account opening, remote signing, and various other signing needs. It supports remote signing, signature status tracking, document role assignment, and more, enhancing document storage and management efficiency in line with digital financial trends.

SelfieSign Video Features

- ✔ Video recording of each signer's signature process
- ✔ No Code: Quickly create various template documents
- ✔ Supports remote signing for various documents, including account opening
- ✔ Flexible customization of signing order according to the workflow
- ✔ Preserves complete information about the signing event, including personnel, time, location, and items
- ✔ Enables document creation, archiving, searching, and verification
- ✔ Non-repudiation ensures the rights of both parties
- ✔ Extensive experience in integrating with financial institutions and medical facilities
- ✔ Highlight key points in agreements with drawing and annotation tools
- ✔ Flexible customization of signing order according to the workflow
- ✔ Preserves complete information about the signing event, including personnel, time, location, and items
- ✔ Enables document creation, archiving, searching, and verification

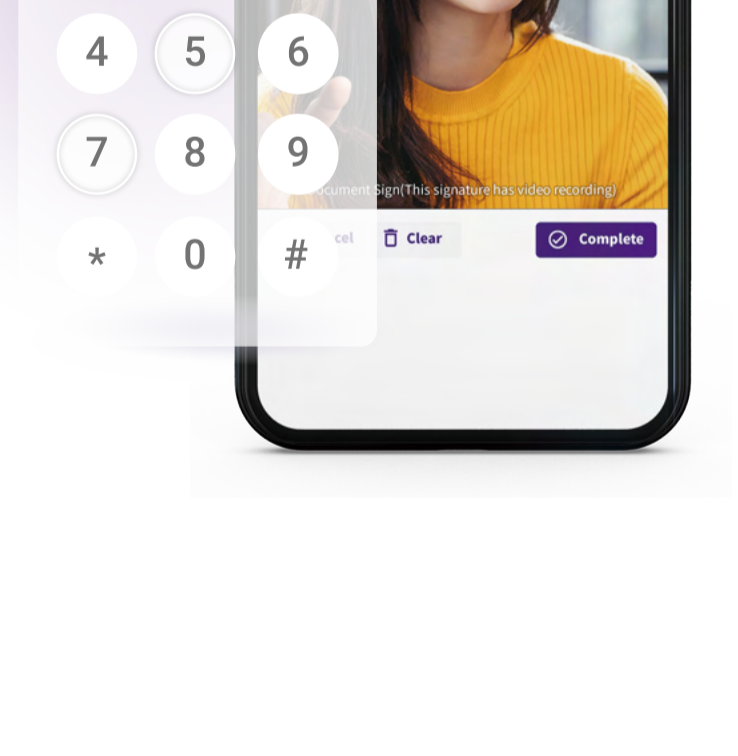

The Advanced Services Provided by SelfieSign

FaceOTP - Three Layers of Security in a Single Snap

During the process of users inputting OTP for transactions, a triple layer of protection is added, including video recording, facial recognition, and live detection. This enhances security, effectively discourages hackers and unauthorized users from using OTP passwords for transactions, and reduces the risk of account theft.

MORE

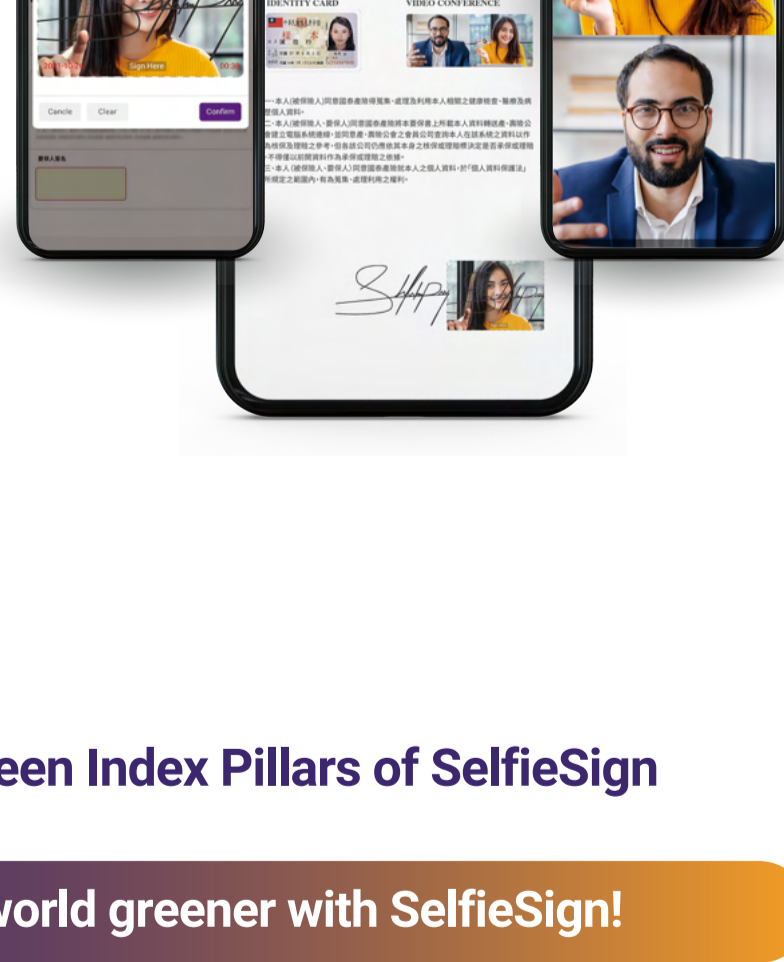

iMeeting - Seamlessly Integrate Video Calls, Signatures, and the Signing Process

Utilizing technology that embeds video, signatures, and audio-visual recordings of the signing process within PDF files, enabling secure online contract handling without the need for physical presence, achieving true "remote" face-to-face signing and accelerating the signing process.
